

PROJECT TOPIC SUMMARY

Every Feature & Topic You Prompted — From Day One

Brandon Boyd Website Project | Creative Coders LLC | Full History

This document captures every topic, feature, and improvement you requested for Brandon Boyd's website — organized by category. Each item shows whether it was completed, planned, or superseded.

PROJECT STATS AT A GLANCE

✓ **Completed (Merged): 37**

📅 **Planned (Proposed): 10**

✗ **Superseded/Cancelled: 37**

Total Tasks: 84

🔧 1. Project Setup & Foundation

Getting the project running in Replit for the first time.

- ✓ **Done** #1 — Set up the imported project
- ✗ **Cancelled** #2 — Prevent silent install breakages from tsx registry block
- ✗ **Cancelled** #16 — Fix broken type check blocking reliable homepage builds

🔑 2. Admin Authentication & Login

Securing and verifying the admin login system with Google OAuth.

- ✗ **Cancelled** #7 — Confirm admin login works on the live site
- ✓ **Done** #8 — Sign in to admin panel without Google in dev
- ✓ **Done** #9 — Confirm admin Google login works on the live site
- ✗ **Cancelled** #10 — Prevent locked-out admins when Google OAuth credentials expire
- ✓ **Done** #11 — Confirm login still works after any future Worker deployment
- ✗ **Cancelled** #12 — Run auth tests automatically on every code push
- ✗ **Cancelled** #13 — Catch a broken session check before it locks out all admins
- ✓ **Done** #14 — Catch 'dev admin bounces to production' regression before it ships
- ✗ **Cancelled** #15 — Enable Google sign-in on the live admin site

🗨️ 3. AI Chat Assistant

Building and improving the AI chat assistant for customer interactions.

- ✗ **Cancelled** #3 — Let homeowners book and track services from their phone via AI
- ✗ **Cancelled** #4 — Turn on AI chat by connecting your Cloudflare account
- ✗ **Cancelled** #5 — Switch AI chat to Cloudflare Workers AI once token permissions fixed
- ✗ **Cancelled** #6 — Turn on AI chat assistant in dev preview
- ✓ **Done** #29 — Upgrade from gpt-4o-mini to gpt-5.4-mini
- ✗ **Cancelled** #76 — Pull live services, FAQs & settings into AI chat prompt automatically

📅 4. Booking System

Full booking flow from customer submission to admin management.

- ✓ **Done** #19 — Show specific time in booking confirmation emails
- ✗ **Cancelled** #20 — Make sure booking confirmations can't send without reachable email
- ✗ **Cancelled** #21 — Show confirmed time clearly on the customer-facing status page
- ✓ **Done** #22 — Admin phone booking entry
- 📅 **Planned** #23 — Show confirmed booking details on customer-facing status page
- 📅 **Planned** #24 — Catch double-bookings before they reach the schedule
- 📅 **Planned** #25 — Make sure phone bookings survive edge cases without silent failures
- ✓ **Done** #42 — Catch malformed bookings in API before they reach the database
- ✓ **Done** #43 — Handle a mix of valid and invalid booking rows gracefully
- ✓ **Done** #44 — Prevent phone-booking dialog from accepting a fully booked date
- ✓ **Done** #45 — Make sure bookings page works when API returns empty list
- ✗ **Cancelled** #46 — Confirm booking API rejects bad data with automated tests
- ✗ **Cancelled** #47 — Use consistent 422 validation errors across all booking endpoints
- ✗ **Cancelled** #48 — (Duplicate) Bookings page works with empty API response

[%É Planned]

[Cancelled]	#51 — Prevent owner from double-booking a time window from the API level
[Cancelled]	#55 — Add appointment reminder email so customers don't forget bookings
[Cancelled]	#56 — Let Brandon print or export his weekly schedule as a PDF
[Planned]	#63 — Keep booking form's service dropdown in sync with admin-managed services
[Cancelled]	#75 — Confirm booking form auto-dismiss still works after future changes
[Cancelled]	#77 — Stop invalid phone numbers from being saved in admin edits & settings

Ø=ÝÓþ 5. Calendar & Schedule Management

Helping Brandon see and manage his daily work schedule.

- [Done] #26 — Daily calendar schedule view with 30-minute slots
- [%É Planned] #33 — Show which days have bookings so owner can jump to them faster
- [%É Planned] #34 — Let owner add notes or job address to a confirmed booking
- [Cancelled] #52 — Confirm calendar view still works when there are no bookings

Ø=Þàþ 6. Admin Panel Features

Tools Brandon uses to manage his website content and bookings.

- [Done] #37 — Fix runtime crash on the Bookings admin page
- [Done] #40 — Prevent Bookings page from going blank when data is missing
- [Done] #41 — Confirm Bookings page loads correctly with real data after crash fix
- [Cancelled] #49 — Prevent a crash in one admin tab from blanking the entire panel
- [Done] #61 — Let owner edit service descriptions without touching code
- [Cancelled] #62 — Keep CTA button labels consistent when copy changes
- [%É Planned] #64 — Prevent homepage service colors from scrambling when reordered
- [Done] #83 — Add Reviews moderation tab to admin panel
- [Cancelled] #84 — Notify Brandon by email when a new review is waiting for approval

Ø=Ý 7. SEO & Online Discoverability

Getting Brandon's business found on Google, social media, and AI search tools.

- [Done] #27 — Local SEO & AI search visibility for Northern Atlanta Metro
- [%É Planned] #35 — Connect real Thumbtack & TaskRabbit profile links for Google verification
- [%É Planned] #36 — Mark up homepage reviews so Google can show them in search results
- [Done] #78 — Expand search and AI discoverability signals
- [Done] #79 — Make the site look polished when shared on social media
- [Cancelled] #80 — Regenerate social preview image if ratings or job count changes
- [Done] #81 — Update internal GSC agency reference PDF with detailed steps
- [Cancelled] #82 — Give Brandon screen-by-screen GSC steps to verify without agency

&j 8. Performance & Lighthouse Score

Making the website fast and scoring 100 on Google Lighthouse.

- [Done] #28 — Lighthouse 100 — performance, accessibility & best practices
- [%É Planned] #30 — Serve gallery & before/after images in WebP to cut photo load time
- [%É Planned] #31 — Self-host Google Fonts to remove third-party font dependency

Ø=Üñ 9. Mobile User Experience

Making the website easy to use on smartphones.

- [Done] #65 — Add a mobile navigation drawer so users can jump to any section
- [Cancelled] #66 — Serve hero photo at mobile resolution to cut phone page load time
- [Done] #67 — Show visual scroll indicators on the reviews carousel
- [Cancelled] #68 — Make mobile nav drawer close when tapping overlay or pressing Escape
- [Done] #69 — Add a 'FAQ' link to the mobile nav drawer
- [Cancelled] #70 — Let customers tap a dot to jump to a specific review on mobile
- [Cancelled] #71 — Confirm new reviews appear as dots immediately after submission
- [Cancelled] #72 — Add 'Book a Service' link to the mobile nav drawer

+P 10. Customer Reviews

Letting customers leave reviews and giving Brandon tools to manage them.

- [Done] #73 — Apply 10-second auto-dismiss and close button to review confirmation
- [Done] #74 — Confirm review form auto-dismiss works after future form changes
- [Done] #83 — Add Reviews moderation tab to admin panel
- [Cancelled] #84 — Notify Brandon by email when a new review needs approval

11. Website Content & Copywriting

Improving the words and messaging across the website.

- [Done] #57 — Refresh About Brandon and Services sections with stronger copy & design
- [Done] #58 — Make every call-to-action button use the same label site-wide
- [Cancelled] #59 — Apply the same refresh to the FAQ and Testimonials sections
- [Cancelled] #60 — Keep the About section proof numbers from going stale

12. Dev Environment & Media

Making sure images and media work correctly during development.

- [Done] #17 — Bring production images into dev so synced data shows correctly
- [Cancelled] #18 — Show a fallback instead of broken pictures when a dev image is missing

13. Release & DevOps

Managing how code gets tested, released, and deployed safely.

- [Done] #32 — Git branching & release workflow
- [%É Planned] #38 — Protect main branch from direct pushes (releases only)
- [%É Planned] #39 — Verify the release script end-to-end with a dry-run mode
- [Cancelled] #50 — Keep the dev preview correct automatically after task agents ship code
- [Cancelled] #53 — Let the release script push version tags to GitHub automatically

14. Documentation & Owner Guides

Written guides to help Brandon manage his website confidently.

- [Done] #54 — Write Brandon's website owner guide with screenshots
- [Done] #81 — Update internal GSC agency reference PDF with detailed steps

15. Legal Agreement (Today's Session)

Protecting Creative Coders LLC legally after delivering the website.

- [Done] Website Development Agreement (Part I) — 13 sections
- [Done] Website Maintenance Addendum (Part II) — 7 sections (A-1 to A-7)
- [Done] Liability cap, business loss disclaimer, arbitration clause
- [Done] Domain & source code transfer policy (Section 9)
- [Done] Maintenance auto-activated by signing — \$20/month from Sep 1, 2026
- [Done] \$1,500 balance explicitly due upon Client's signature
- [Done] Full 3-page professional PDF generated and delivered

Done (Merged)

Feature is live on the website

%É Planned (Proposed)

Approved and ready to build

Superseded / Cancelled

Replaced by a better approach
