

Getting Your Website Found on Google

Penny Lane Home Solutions

Hi Brandon! Here are the steps to get your website showing up in Google search results. These are one-time setup tasks on your end to establish your business's official presence with Google.

Step 1 — Set up Google Search Console

A free Google tool that shows how your site appears in search results and flags any issues.

1. Go to <https://search.google.com/search-console/welcome> and sign in with your Google account:

Sign in with: brandon.boyd.po@gmail.com

2. Click Add property.
3. Choose Domain and type in: pennylanehomesolutions.com
4. Google will show a verification code on screen.

Your actions on this step:

1. Google will display a short text code on screen. Copy it and send it to creativecodertech@gmail.com
2. Creativecoders will add it to your domain settings and notify you when done
3. Once Creativecoders confirms, come back to this GSC screen and click Verify

5. Go to Settings ! Users and permissions ! Add user, enter creativecodertech@gmail.com and set the role to Owner.

Why is this needed?

This gives Creativecoders access to submit your sitemap, request indexing, and monitor your site performance. Without this step, they cannot manage anything in your Search Console on your behalf.

Note: Your Google account (brandon.boyd.po@gmail.com) remains the permanent owner. If you ever change agencies, simply remove creativecodertech@gmail.com — you keep 100% of your data, search history, and website information.

Step 2 — Set up your Google Business Profile

This puts your business on Google Maps and in local results when someone searches "handyman near me." It's the single biggest driver of local leads.

1. Go to <https://business.google.com/create> and sign in with your Google account:

Sign in with: brandon.boyd.po@gmail.com

2. Search for "Penny Lane Home Solutions" — if it already appears click Claim this business; if not click Add your business.
3. Fill in your details:
 - **Business name:** Penny Lane Home Solutions

Category: Handyman

- **Service area:** Canton, Woodstock, Holly Springs, Ball Ground, and surrounding cities (no physical address required)
 - **Phone and website:** pennylanehomesolutions.com
 - Business hours
4. Complete Google's verification step — they typically offer a postcard, phone call, or video option.
 5. Go to Business Profile settings !' Managers, enter `creativecodertech@gmail.com` and set the role to Manager.

Why is this needed?

This gives Creativecoders access to add your services, photos, and business hours, and to respond to reviews on your behalf.

Note: Your Google account (`brandon.boyd.po@gmail.com`) is always the permanent owner of your Business Profile. Creativecoders only has access because you granted it.

Once both steps are done, send a confirmation.

Everything else will be taken care of — sitemap submitted, indexing requested, and your star ratings set up to appear directly in search results.
